

FlyRank AI Internship — Week 3 Deliverable

Assignment: Decide Once: Build Your Identity Kit

Track:	General AI Fluency
Phase:	Foundations (Week 3)
Workload:	2 Hours
Intern:	Abdul Raheem
Status:	Ready for Submission

Executive Summary

A consistent visual identity is what separates a portfolio that feels intentional from one that feels thrown together. Design consistency comes from making a small set of deliberate decisions once, allowing every page, project card, and ML case study to inherit them automatically.

Core Purpose: Establish a minimal, high-precision visual system engineered specifically to showcase production-ready ML models, empirical benchmark data, and clean interactive web interfaces without visual distraction.

1. Typography System

The identity kit selects two core free fonts (from Google Fonts) plus a dedicated monospaced font strictly for code snippets and empirical benchmark metrics.

Role	Font Family	Category	Usage Rationale
Heading Font	Plus Jakarta Sans	Geometric Sans	Crisp, bold geometric letterforms conveying modern technical authority.
Body Font	Inter	Humanist Sans	Clean, neutral, high-legibility typeface designed for technical copy & UI.
Metrics / Code	JetBrains Mono	Monospaced	Monospaced precision font reserved for tabular metrics, F1 scores, and code.

2. Tight Color Palette (4 Tokens)

The palette uses 4 tight, high-contrast colors designed to frame empirical technical work rather than compete with it.

Token Role	Color Name	Hex Code	Visual Purpose & Guardrails
Near-White Bg	Slate Canvas	#F8FAFC	Crisp neutral background; avoids harsh white glare.
Near-Black Text	Dark Slate	#0F172A	Primary text, headers, and borders for contrast.
Main Brand	Tech Sapphire	#1E40AF	Anchor brand color for navigation, CTAs, and active states.
Metric Accent	Empirical Emerald	#059669	Reserved strictly for metric callouts (F1, Accuracy) & live status.

3. Logo & Favicon Monogram

The logo is a clean geometric **AR** monogram (Abdul Raheem) enclosed in a precision 1.5px border badge with a live status dot indicator.

Monogram Specs: 40px × 40px Logo / 32px × 32px Favicon | Border: #0F172A (Dark Slate) | Accent: #059669 (Empirical Emerald status dot) | Typography: Plus Jakarta Sans ExtraBold (800).

4. Two-Line Style Note

Fonts: Plus Jakarta Sans (Headings), Inter (Body), JetBrains Mono (Metrics). Palette: #F8FAFC (Bg), #0F172A (Text), #1E40AF (Main), #059669 (Metric Accent).

Mood: Minimal, high-precision technical lab aesthetic designed to let empirical benchmark data and clean interactive ML tools take center stage.

5. Pass / Revise Audit Checklist

- [X] One or two fonts, not a pile:** Selected Plus Jakarta Sans for headings and Inter for body copy (JetBrains Mono for metrics).
- [X] A tight palette (3-4 colors) with actual hex codes:** Defined 4 exact tokens (#F8FAFC, #0F172A, #1E40AF, #059669).
- [X] A simple logo or favicon exists:** Created geometric AR monogram badge with SVG vector files and inline preview.
- [X] Style note describes a single coherent mood:** Two-line style note clearly frames the work with a minimal, high-precision technical lab aesthetic.

6. Portal Submission Copy

FlyRank AI Internship — Week 3 Assignment: Decide Once: Build Your Identity Kit

Intern: Abdul Raheem | Track: General AI Fluency

Identity Kit Deliverable Summary:

- Type System: Plus Jakarta Sans (Headings) + Inter (Body) + JetBrains Mono (Metrics & Code).
- Tight Palette: #F8FAFC (Bg), #0F172A (Text), #1E40AF (Main), #059669 (Metric Accent).
- Monogram Logo / Favicon: Minimal geometric 'AR' badge with live Emerald status dot indicator.
- Two-Line Style Note added to AI Tutor prompt & AGENTS.md for full build consistency.
